

Digital forensic services

Quality analysis you can trust

From cell site analysis to computer and mobile device forensics, QCC offers specialist support for your digital investigations. Our experienced team of in-house analysts continuously update our digital forensic offerings to provide cutting-edge investigative services you can rely on, with meticulous attention to detail and development of our own analytical tools.

World-class quality

At QCC, we pride ourselves on providing a reliable, high-quality service. Our skilled forensic staff combine both technical and practical law-enforcement expertise, and are experienced in presenting evidence in court.

Whether investigating criminal, civil or commercial cases, we follow the same ISO9001 quality-assurance process. Every report is peer-reviewed and checked by a senior ex-police officer with considerable experience in hi-tech crime. And our exacting quality assurance standards ensure that all evidence collected can be relied on in a legal setting.

Keeping pace with a changing world

The digital world doesn't stand still and neither do we. Our team is constantly monitoring new types of electronic crime and devising innovative ways to pinpoint and collect evidence.

We work proactively within the digital forensic community, continuously extending our capabilities and pushing the boundaries of digital forensic science. To this end, we have developed a range of cutting-edge analytical tools, including our internationally-acclaimed CaseNotes application.

Flexible approach

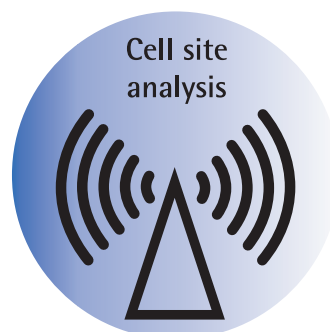

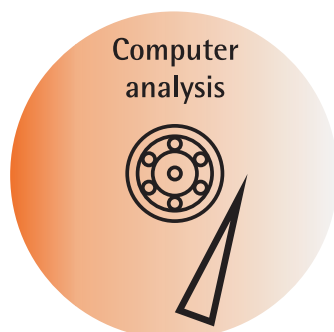

At QCC, we know that security incidents can occur at the most inconvenient times. We offer an open channel of communication that is not limited to normal working hours, and we will keep you informed about our progress as and when you need an update.

Our capacity to undertake examinations at 'no notice', as well as our ability to work within client time/cost restraints, make QCC the ideal digital forensic partner for your organisation.

Secure seizure, transportation and storage

Our security cleared and experienced staff will help you gain controlled access to exhibits in the most timely, cost-effective and risk-limiting way. We can then optionally seize and securely transport exhibits and maintain them in our environmentally sound and highly secure storage facility ready for processing or return at any time.

QCC digital forensic services

Comprehensive services

QCC offers a complete end-to-end service – from on-site analysis, seizure and collection of exhibits, to processing within our secure-storage imaging laboratory, timely and cost-effective analysis by our dedicated specialists, and production of forensic reports as well as the safe return of all subject items.

Our state-of-the-art laboratories are equipped with industry-standard tools to examine a whole range of computers and mobile devices likely to be submitted for examination – from the latest smartphones to the largest hard drives. Our central London location means we are well placed to deal with urgent cases in the capital and surrounding areas.

QCC digital forensic services

We offer a wide range of digital forensic services, including:

- **Computer analysis**
Forensic examination of data from laptops, desktop computers, tablets, servers and other digital devices.
- **Electronic discovery**
The 'indexing' of data, allowing clients to conduct their own searching and discovery procedures at their convenience. This process can be very cost-effective, especially if the target data is not specifically known.
- **Mobile device forensics**
Extraction and reporting on data from handheld devices, including deleted data from SIM cards and most handsets, including iPhone.
- **Cell site analysis**
Analysis of call data to establish the areas where communications were made or received. This can be used for intelligence gathering or as supporting evidence for use at court.

About QCC

Established in 1996 as one of the first independent information security companies in Europe, QCC has a strong reputation across all areas of proactive and reactive security and risk management services. These include security management consultancy, risk assessment and digital forensics, as well as payment card security and security awareness training.

With considerable experience working in the public and private sector, our highly-skilled consultants are uniquely placed to help you develop a clear and robust information security strategy for your organisation.

Identify. Quantify. Fortify.
